

Voltaris

ENERGY INFRASTRUCTURE

Energy Infrastructure Development & Investment Platform

Voltaris Energy Corp is a Canadian energy infrastructure development and investment platform advancing large-scale infrastructure projects. The platform develops infrastructure assets, structures capital participation with investors, supervises project development through engineering oversight, and participates directly as an equity investor. Voltaris focuses on projects in Canada and Romania with the objective of building a portfolio of long-term energy infrastructure assets.

Platform Scale

- 5+ GW Generation Capacity
- 14+ GWh Energy Storage
- 1.4 GW AI Compute Infrastructure
- €29–30B Estimated Platform CAPEX

Platform Model

Voltaris operates as an integrated infrastructure platform combining project development, engineering supervision, and capital structuring. The platform advances projects through defined development structures that support institutional capital participation and long-term asset ownership.

Core Capabilities

- Project Development
- Capital Structuring
- Engineering Oversight
- Equity Participation

Development Framework

Voltaris participates across the infrastructure development lifecycle.

- Project Identification
- Engineering & Feasibility
- Regulatory & Commercial Structuring
- Capital Structuring
- Project Delivery Oversight
- Long-Term Asset Strategy

Strategic Partner Ecosystem

Voltaris coordinates development through a network of engineering, technology, and infrastructure partners across multiple domains.

- Energy & Storage
- Technology OEMs
- Solar & Renewables
- Industrial & Carbon Infrastructure
- Digital Energy & Trading
- Capital & Construction

Projects are advanced with engineering, delivery, and market participants aligned prior to capital deployment.

Markets

Canada

Stable regulatory environment with consistent infrastructure demand.

Romania

European market with ongoing generation and grid modernization.

Leadership

• Jon Romulus Ciobanu

Chief Executive Officer

Engineering background, international logistics leadership, and experience in global commercial transactions and infrastructure-related operations.

• Dumitru (Mike) Ghemis

COO & Technical Director

Over 150 energy infrastructure projects, more than \$120 million in managed projects, and experience across 50–400 MW developments.

Investment Positioning

Voltaris structures infrastructure projects for institutional participation through defined technical, commercial, and capital frameworks. The platform participates directly as an equity investor, aligning with long-term asset performance.
